The Gawlicki Family Foundation Awards St. Patrick's School \$150,000 Grant for Full STREAM Ahead Program

St. Patrick's to revamp science and technology programs.

YORKTOWN HEIGHTS, NY. (June 9, 2017) – The Gawlicki Family Foundation is awarding [St. Patrick's School](#) in Yorktown Heights a \$150,000 grant to implement its Full STREAM Ahead Program, the school announced today. These funds will be used to purchase state-of-the-art technology, make facilities upgrades, and provide professional development training for its staff. The upgrades will be completed before the start of the 2017-2018 school year. The funding will also provide ongoing professional training for three years.

In expanding St. Patrick's technology program, the school's offerings will be highly competitive with those provided by Yorktown Heights' Public School System.

“We are grateful for these funds and fully appreciate the magnitude of this commitment from the Gawlicki Family Foundation,” said Darlene Del Vecchio, Principal of St. Patrick's School. “We are proud to announce that we will be using these funds to enhance the science, math, and engineering curriculum in keeping with the National Catholic Education Associations' national technology initiative.”

“St. Patrick's School is focused on delivering the technology training needed by today's students,” said Ted Gawlicki, of the Gawlicki Family Foundation. “These funds will allow the school to continue to provide the high quality, individualized education for which the school is known. For more information about St. Patrick's School, please call 914-962-2211, or visit [St. Patrick's School](#).

About St. Patrick's School

[St. Patrick's School](#), a Catholic co-educational institution of learning for students in grades Pre-K3 through 8, seeks to provide a total program of instruction, emphasizing the spiritual, moral, intellectual, social, cultural, and physical development of every child. In a creative environment, St. Patrick's School provides an exceptional, technology-enriched education to develop knowledge, stimulate growth and form life-enriching experiences. In this family atmosphere, we promote an environment where knowledge is constantly pursued, while providing the means to develop individual student skills and talents.
